

PROJECT STATUS REPORT

Project Name	Sustainable Product Guide
Project Description	<p>Purpose of this project is to build a mobile application which will allow users to explore eco-friendly skincare products and gain more knowledge relevant to eco-friendly products and their impacts.</p> <p>The goal of this application is to reduce lack of awareness among consumers and contribute towards one of UN sustainable development goals i.e. Responsible Production and Consumption.</p>
For Week Ending	March 24, 2021
Project Status	Yellow-Green
Status Description	Since the comment and review feature is delayed due to firestore streaming errors. Will be ready and fixed by next scrum

Activities—During the Past Week

1. Finished product form screen for adding new products
2. Finished user profile screen
3. Finished image screen

Activities—Planned for Next Week

1. Eco-logical labels
2. Info screen
3. Finish comment feature
4. Make GUI changes(add app icon)

Project Issues

1. Time management
2. Less knowledge if firestore storage for images (streaming with images took me long time)

Project Changes

Might change eliminate rating feature which will not allow user to give rating stars to product

Reflection

- Project is on track, as the major thing missing is eco-logical tags.
- Progress: Product form screen now allow users to add products which is a good feature for this app

What barriers (if any) do you feel is/are a current impediment to success?

-
- Lack of time due to other projects and assignments

What help (if any) do you require to move positively forward?

- More knowledge on how to stream images

What questions or concerns do you have (if any)?

- None at this time
-
