PROJECT STATUS REPORT

Project Name	Sustainable Product Guide
Project Description	Purpose of this project is to build a mobile application which will allow users to explore eco-friendly skincare products and gain more knowledge relevant to eco-friendly products and their impacts. The goal of this application is to reduce lack of awareness among consumers and contribute towards one of UN sustainable development goals i.e. Responsible Production and Consumption.
For Week Ending	March 7, 2021
Project Status	Green
Status Description	Since individual components of the application are completed, most of the components now only need to be connected to the Firebase Firestore database.

Activities—During the Past Week

1. Finished Login Screen (GUI)
2. Finished Sign Up Screen (GUI)
3. Created Firestore Database
4. Initialized Database on the App
5. Home Screen
6. Info Screen (with information eco-friendly tags)

Activities—Planned for Next Week

1. Connect GUI components to database
2. Create user profile screen
3. Allow comments and reviews

Project Issues

The only issue at this point is time management.

Project Changes

No changes as of now

Reflection

- Project is on track as it has 80% of GUI finished and database structure done.
- Progress: Database structure and initialization took me a lot of time in my capstone but it was quite easy for this project since I was already familiar with most of the issues.

What barriers (if any) do you feel is/are a current impediment to success?
- Lack of time due to other projects and assignments

What help (if any) do you require to move positively forward?
- More knowledge on how to manage navigation system will probably improve quality of code

What questions or concerns do you have (if any)?
- None at this time
